ANNUAL ORDINARY GENERAL MEETING OF SHAREHOLDERS

Notice is hereby given to the Shareholders to attend the 27th Annual General Meeting of Awash Insurance Company S.C. that will be held in accordance with Article 393(1) and 394 of Commercial Code of Ethiopia Proclamation Number 1243/2021. The meeting will be held on Saturday October 30, 2021 at Addis Ababa Hilton Hotel starting from 8:00 a.m. The Company's subscribed capital is Birr 1.2 Billion (as at June 30, 2021 Birr 754,883,000 paid up capital), Registration Number of the Company is 1532/87, with its Headquarters located in Addis Ababa, Kirkos Subcity, Awash Towers.

Therefore, Shareholders are kindly invited to attend the general meeting in person or through a proxy.

- 1. Consideration of Share Transfers and New Shareholders who acquired shares in 2020/21;
- 2. Consideration of the 2020/21 Annual Report of Board of Directors;
- 3. Consideration of the 2020/21 Annual Report of Auditors;
- 4. Deliberation on and approval of items 2 & 3 above;
- 5. Deliberation on and approval of the proposed appropriation of 2020/21 profits;
- 6. Approval of Annual Compensation of Board of Directors for 2020/21;
- 7. Approval of Board of Directors' monthly allowance for 2021/22;
- 8. Approval of Auditors' fee for 2021/22;
- 9. Election of members for Board Directors' Nomination & Election Committee;
- 10. Consider and fix fee for Board Directors' Nomination & Election Committee.

N.B.

Shareholders who are not able to attend in person on the meeting may sign and return the proxy form and give one copy to the designated agent and the second copy along with the copy of renewed identification card of a shareholder to be submitted to the Company's CEO office, on the 15th floor of Awash Towers, three days before the meeting date.

CHAIRMAN'S STATEMENT

Kebede Borena Chairman, Board of Directors

On behalf of the Board of Directors and on my own behalf, it is my pleasure and privilege to welcome you all to the 27th Annual Ordinary General Meeting of Shareholders.

The detailed report on performance and the accomplishments of the year 2020/21 is presented in the Directors' Report and the Financial Statements appended thereto. My statement presents the highlight of the major ones.

The performance of insurance companies in the face of the unprecedented challenges brought about by COVID-19 pandemic seems to be phenomenal. Regardless of its negative impact, the industry's combined written premiums grew by 24.3%. Our Company's growth in both Non Life and Life was a record high achievement of 43%. AIC's combined premium income crossed the 1 billion mark at Birr 1.27 billion, exhibiting a landmark event in the history

of the private insurance companies in Ethiopia over its journey of three decades.

The achievement, grand as it obviously is, ascertained once again and beyond any doubt that our Company, AIC, rightfully deserves the unbeatable leading market position in the private insurers category. Our Life written premiums have, of course, excelled all and assumed total leadership of the market for the first time in 26 years.

The FY 2020/21 also marked the completion of the five year period of the third Strategic Plan (SPM III). We are, therefore, happy to announce and herald the successful finalization of the Company's Vision 2030 strategic plan project, "Vision 2030: Transforming AIC", that aims at repositioning our Company and its operations as we embark on a new decade.

The combined net profit before tax for both Life and Non-Life operation was Birr 290.38

million as at June 30, 2021. The net profit aftertax showed growth of 29% and reached Birr 270.1 million at the close of business. The bottom-line results mentioned right above were satisfactory given the various macroeconomic challenges experienced during the FY 2020/21 and the terrible disruptions in the economic life of the country and the globe at large as a result of COVID-19.

Our paid-up capital as at June 30, 2021 reached another new height of Birr 754.88 million. Its growth over the FY 2019/20 was Birr 226.3 million which was close to 43% rise in capital. Accordingly, our earnings per share was Birr 178.90. The returns on investment of 36% against the background where ample economic and industry specific challenges surfaced, growth in the capital base and given the severe impact of COVID-19 pandemic was satisfactory, by all standards, and deserves sincere appreciation.

The achievements of the budget year under review should be applauded when weighed in terms of factors such as increase in asset base, various investments made in properties and in other viable businesses to ascertain maximization of our shareholders wealth.

Lastly, I would like to express my heartfelt gratitude to the most valued customers of our Company for their continued patronage. Our human capital has always played a crucial role in carrying the Company forward; a very special thanks to the Management and staff of AIC. Allow me also to thank the colleagues on Board of Directors for their commitment to ably discharge their responsibility in a duty bound manner and ushering the spirit of togetherness in an exemplary way.

The Management and the entire staff of Awash Bank, and the office bearers of the Supervisory Authority, the NBE, all deserve our heartly gratitude and vote of thanks.

In accordance with the relevant provisions of the Commercial Code of Ethiopia, Proclamation No. 1243/2021 and of the Company's Memorandum of Association, I humbly submit to you the Annual Report and the Audited Financial Statements for the year ended June 30, 2021 for your kind consideration and approval.

Thank you.

Kebede Borena Chairman, Board of Directors Awash Insurance Company S.C.

REPORT OF THE BOARD OF DIRECTORS

I.INTRODUCTION

The Directors feel honored and privileged to submit to the Shareholders of Awash Insurance Company S.C the Annual Report and the Audited Accounts for the Fiscal Year (FY) ended June 30, 2021.

In this concise report, major activities and achievements of the fiscal year 2020/21 would be highlighted. Brief overview of the broader economy and the business environment is also part of the report.

II.BUSINESS ENVIRONMENT

1. THE GLOBAL ECONOMY

The global economy still remains, after eighteen months, soaked in pervasive uncertainty as COVID-19 virus mutations keep the threat level high.

According to the World Economic Outlook (IMF's) growth projections, the world output, i.e, GDP growth, was -3.3% in 2020. Global growth was projected at 6.0% in 2021, moderating to 4.9 percent in 2022 (IMF July Report). Advanced economies and the emerging market and developing economies, except China, all registered negative growths in 2020.

One year and half into the pandemic, global prospects remain highly uncertain. Economic recoveries are diverging across countries and sectors, reflecting variation in pandemic induced disruptions and the extent of policy support.

2. THE ETHIOPIAN ECONOMY

No country, including Ethiopia, was an exception; the COVID-19 pandemic had a global and far-reaching impact on all economies. The Ethiopian economy, according to the ADB Group's economic outlook on Ethiopia, grew by 6.1% in 2020 (ADB, Ethiopian Economic Outlook, July 2021) down by 2.3 percentage points largely because of the crushing impact of COVID-19 pandemic. In 2019, it was 8.4%. Growth was led by the services, to which our industry belongs, and the industry sectors. Real GDP growth in 2021 is projected to fall to 2%, according to ADB Group's latest forecast. Among the major challenges of the macroeconomy, inflation in 2020, according to same sources, reached 20.6%. Foreign Direct Investment (FDI) fell by 20% to 2.2% of GDP; personal remittances too declined by 10% to 5.3% of GDP, both sourced from ADB Group's July 2021 report.

3. THE INSURANCE INDUSTRY

Despite the macroeconomic challenges experienced in FY 2020/21, the Ethiopian insurance industry, according to the industry data from the National Bank Of Ethiopia, NBE, showed that market Gross Written Premiums (GWP) in Non-Life grew significantly by a strong 22%. Compared to the previous year (FY 2019/20), growth in Non-Life, however, declined by around 1.3%. At the close of business on June 30, 2021, Long-Term (Life) business increased from Birr 578.96 million in 2019/20 to Birr 958.75 million.

Growth in Life premiums was buoyant and an exceptional rebound from 12.6% in 2019/20 to 65.6% in FY 2020/21 owing mainly to a very robust growth registered by our Company, AIC. Assuming for 93% of the total written industry premiums, Non-Life business has, as obvious, continued to take the lion's share of the industry's premium portfolio.

III. THE PERFORMANCE OF OUR COMPANY

A. Operational Performance And Results

AIC's combined premium income for Life and Non-Life businesses for the year ended June 30, 2021 grew by a robust 43% to Birr 1.27 billion. Non-Life business registered growth of 23% while Life saw a record growth rate of about 173% weighed against the preceding year. The growth in the year under review in both Non-Life and Life was very strong juxtaposed with the 12.2 and 11 percentage points of the previous year respectively.

Closer and deeper analysis of the actual performance of each class of Non-Life business brought to light the fact that all classes, with the exception of Engineering class, exhibited positive growths. It would be proper to report that the growth was not only positive but strong ranging from 9% in WCGN up to the highest 89% in Bond class of business. The "Others" and Fire classes registered 60% and 28% growth percentages respectively signaling positive outlooks about the future.

Annual Performance Review Meeting

Another important development worth reporting was that Motor in the portfolio mix dropped for the third year in a row to 53%. The share in the mix of classes like Fire and those small premium (miscellaneous) classes grouped under "Others" class of business, on the other hand, increased their share and assumed better proportions in the mix as planned.

To sum up, our comparative premium structure analysis portrays that developments in the portfolio mix are right on the track.

Coming back to the major component of the Company's cash outlay, the Non-Life net claims incurred for the year ended June 30, 2021 was Birr 340.05 million. The net claims ratio for all Non-Life classes was, therefore, 57.7% as at June 30, 2021. In the past two consecutive years, the claims ratio stood at 56 percent.

B. Financial Results

The financial year that ended June 30, 2021 yielded yet another astounding net profit before tax of Birr 290.38 million displaying a very remarkable rise of 31.3%. The net profit after tax for the year stood at Birr 270.1 million. The Directors recommend that the net profit of the year be declared as dividend. Shareholders may, however, plough back to settle their outstanding subscriptions (if any) or collect their dividends in cash.

Annual Performance Review Meeting

At this juncture, it would be worthwhile to report to you, our Shareholders, that the paid-up capital of our Company shot-up and reached new height of Birr 754.88 million as at June 30, 2021. The growth was a significant rise by 43%; record growth over the last many years. It was, therefore, against this jump in the paid up capital that we succeeded to achieve earnings per share (EPS) of Birr 178.90 or 36% return on investment.

IV. HIGHLIGHT ON MAJOR ACTIVITIES

1. BRANCH EXPANSION

It gives us distinct pleasure to report to you on market and business development efforts during the fiscal year. One of the strategies designed to attain our corporate goals was to expand our network of physical outlets.

We managed to open only one full-fledged branch in Debrebirhan town, North Shoa, Amhara National Regional State. Although many were in the pipeline as per our plan and as justified by market study, additional expansions into the regions, in particular, were not possible because of mainly forces beyond control. The second outlet opened was a contact office here in Addis Ababa, around Hotel D'Afrique.

Added to these two, one contact office here on the outskirts of Addis Ababa was upgraded to a branch level during the budget year.

At close of the year on 30 June 2021, the number of market outlets, branches and contact centres, therefore, reached 59 (51 full-fledged branches and eight contact offices).

We will continue to expand to reach out to important and commercially viable locations based on, of course, profound and thorough market studies and as situations on the ground change to ascertain our easy accessibility.

2. HUMAN RESOURCE DEVELOPMENT

Our Company always recognizes its human capital as the most valuable asset and strives to continually enhance its capabilities all of which are crucial for organizational success.

The Company's staff strength as at June 30, 2021 grew and reached 608, its male/female ratio was nearly 1:1. AIC was also committed towards investing on its human resource through training and development. Accordingly, quite a significant number of its staff attended trainings (both long-term and short-term including through correspondence) in the period meant to fill up skill and knowledge gaps and ultimately ascertain its HR development strategy.

The Company through its thoughtful investment on its crucial asset, the Human Capital, would help harness the commitment and dedication of its entire work force to ascertain lasting success. Not only on training and development but the Company's Management also continued to invest on its corporate culture of maintaining conducive working environment which helped and would contribute a lot towards greater results.

AIC Staff (in partial) with CEO

3. INVESTMENT

Experience amply justifies that the continued profitability of insurance business can be enhanced and sustained through portfolio diversification. Cognizant of the contemporary investment landscape in our country, the Board of Directors was critically examining the viability of various project proposals tabled for its decision.

In an effort meant, therefore, to maximize the Shareholders' benefits, an additional investment of Birr 107.59 million was made in bank shares and Birr 15.07 million was invested in two different companies during the year under report. AIC also committed an additional investment of Birr 10 million for the acquisition of landed property nearby our Urael Building during 2020/21.

4. CORPORATE SOCIAL RESPONSIBILITY (CSR)

The Board of Directors, in its resolute aim and purpose of relinquishing social responsibility as a corporate citizen, approved pledges in the amount of Birr six million to support various social and national causes.

The Company, in joining the nation's painstaking and arduous efforts of fighting back COVID-19, has contributed its part to avert the spread of or minimize the deadly effects of the pandemic.

As part of its CSR program and to relinquish its responsibility as a corporate entity, the Company established a Taskforce composed of Management members with the primary objective of mitigating the impact of COVID-19 on our critical asset, the staff, and, of course, on the day to day operations and performance of the Company at large. The fight against the pandemic will continue as one of the major tasks up until the disease's effects subside or brought to the minimum.

V. STATEMENT ON CORPORATE GOVERNANCE

The major activities of the Board accomplished during the Fiscal Year 2020/21 so as to ensure compliance and to remain committed to the practice of corporate governance are summarized as follows:

- a) Training was provided to Board Directors focusing on Enterprise Risk Management and standards of corporate governance;
- b) In the fiscal year, 12 regular and 14 special Board meetings were held; most Board Directors attended all meetings while some of them attended above the minimum requirement of 75% of the meetings. In these meetings, the Board considered Management reports and resolved on matters of strategic importance;
- c) The Board approved new policies and amended existing policies, strategies, business plan and budget as per the requirements of Insurance Corporate Governance Directives. Such guiding corporate documents were approved upon incorporating comments after considering the drafts presented by the Management;
- d) The Board Committees for Audit, Risk Management and Compliance, Business Development and Strategy, Human Resource Affairs as well as Investment and Projects Follow Up were active in supporting the Company. All the Board Committees held monthly meetings and submitted quarterly reports to the Main Board. Based on the reports of Board Committees, the Board gave strategic guidance to the Management upon considering such reports;
- e) The Board considered draft insurance products and endorsed such new products upon detailed consideration of the studies accompanying the proposals;

Life Assurance Sales Week

- f) The Board gave decisions on strategic investment proposals upon undertaking indepth consideration of investment recommendations. Besides, the Board reviewed the implementation status of projects in which the Company invested based on progress reports submitted to it and gave appropriate guidance on same. In addition to capital projects, the Board reviewed and monitored the progress of the design of Vision 2030 Strategy as well as information technology projects on Life & Health Solution, and Disaster Recovery Site;
- g) The Board gave instruction on the preparation and conduct of the 26th Ordinary General Meeting and 10th Extraordinary General Meeting of Shareholders and followed up the timely registration and authentication of the minutes of the General Meetings. The implementation of the resolutions of general meetings of shareholders was closely monitored. Guidance was also given to the Management for the necessary preparation to conduct the 27th Annual Ordinary General Meeting of Shareholders;
- h) The Board appraised the potential of a Sharia compliant Takaful business and resolved to launch Takaful business. As a result, the Company was authorized to undertake Takaful business as "Takaful Window Operator";
- i) The Board regularly monitored corporate performance based on qualitative and quantitative reports and attended semi-annual and annual management review meetings. Accordingly, the Board encouraged the Management and Staff to exert utmost efforts to realize the corporate targets and to further enhance the competitiveness of the Company; The Board also monitored the implementation status of its resolutions;
- j) The Board reviewed off-site surveillance reports of the National Bank of Ethiopia and Financial Intelligence Center. Subsequent to such consideration, the Board monitored the actions taken by the Management on same;
- k) The Board considered the progress of the Transformation Project, Vision-2030 Strategy. Upon rigorous consideration of various alternatives, the Company commissioned Deloitte Consulting Ltd. to design Vision 2030 Strategy. Accordingly, the Consultant submitted draft strategy of Vision 2030. Then, the Board appraised the proposed Vision 2030 Strategy and endorsed it to serve as the Company's roadmap up to 2030;
- I) The Board motivated the Management and staff members by allowing bonus and salary increment as the Company successively maintained its market leadership among the private insurance companies. The Company is the pioneer private insurer to cross Birr One Billion Gross Written Premium mark from both general insurance and long-term insurance business at the end of the fiscal year 2020/21; and

m) The Board held annual assessment focusing on the effectiveness of the Board as a whole, Board committees and individual Board Directors. From the assessments, important lessons were drawn in order to improve the Board's effectiveness.

VI. FUTURE PROSPECTS

The new developments and the dynamics in the financial services sub-sector like the mushrooming of as many as 20 new banks coupled with the coming into picture of interest free banks (including those under formation), the Government's real commitments to further liberalize the economy through the privatization of public enterprises, including strategic ones, like Ethio-Telecom and the revitalization of privatization programs, the soon to happen introduction of capital market to Ethiopia would certainly stimulate and spur economic activities and catalize economic development for the country as a whole. These would ultimately help the insurance business to thrive and do better.

Ethiopia's economy grew by 6.1% in 2020 (ADB, Ethiopia Economic Outlook, July 2021). It was 8.4% in 2019. The decline in performance was mainly because of the impact of COVID-19 pandemic. Sourced from the same ADB sources, the real GDP growth in 2021 is projected to fall to 2%, then recover to about 8% in 2022 (the years covered in our new Business Plan of 2021/22).

The above are positive developments at macro level. On the internal front, our Company has taken very daring initiatives that would not only speed up its growth but propel and take AIC to the highest level and make it one of the regional players. Among these projects was the transformative vision 2030 strategic initiative. It was taken up after thorough and deep internal and external analysis of the competitive environment that necessitated the courageous decision of looking beyond the horizon. The bold decision on approval of Vision 2030 Strategy and the implementation of the strategic and transformative 10 year project would, therefore, be expected to yield concrete results ushering significant growth in our market shares.

Vision 2030 —Transformation Project Signing Ceremony

The Company's pre-emptive investments in technology and the successes registered in automating operations; the commitment and the practical steps being taken in developing and/or customizing and introducing "new" products to the market; investment in the human resources of the company and the non-stop plus rigorous efforts underway to enhance the quality of our customer services meant to bring about operational efficiency that excels would all produce concrete results taking AIC to the next higher level. Our Company's planned business development and expansion endeavors plus investment diversification efforts based on the outcomes of profound feasibility studies would serve as great prospects to expect and ascertain grand results amidst the tough challenges in the competitive landscape in the industry.

Looking forward to FY 2021/22 and as we embark on the new decade of transformation in our Company's history, we hope and believe our determination to and aspiration to become the leading and most dependable insurer of choice will begin realizing through the implementation of the key strategic initiatives enshrined in Vision 2030 Strategy.

VII. VOTE OF GRATITUDE

The Directors wish to express their deep gratitude to all who have made the FY 2020/21 a success. Our special vote of thank goes to the most valued customers of our Company for their continued patronage. Our Shareholders deserve heartly appreciation and due respect for rallying behind and giving their support during the difficult times.

Our reinsurers, brokers (local and overseas) and agents (our field officers) all deserve our vote of thanks for their contribution. We also seize this opportunity to thank the National Bank of Ethiopia for the understanding and guidance, the whole management and entire staff of our sister company, Awash Bank, for their most valuable contributions.

Finally, the Board of Directors wishes to record its sincere gratitude to the management and staff of AIC for their dedication to the cause of the Company. The grand result achieved during the most difficult year of 2020/21 under the influence of the pandemic and many other odds would not have been possible without their demonstrated commitment and strong team spirit throughout all those tough months of the period.

Thank you.

Statement of Directors' Responsibilities

In accordance with the Financial Reporting Proclamation No. 847/2014 and Insurance Business Proclamation No.746/2012, as amended by the Insurance Business (Amendment) Proclamation No.1163/2019, all reporting entities established in accordance with the Ethiopian law or operating in Ethiopia are to prepare financial statements in accordance with the International Financial Reporting Standards.

The Company's Management is responsible for the preparation and fair presentation of these financial statements in conformity with International Financial Reporting Standards and in the manner required by the Commercial Code of Ethiopia in conformity with International Financial Reporting Standards and in the manner required by the Commercial Code of Ethiopia, Proclamation No. 1243/2021 and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. The Company is required to keep such records as are necessary to:

- A) exhibit clearly and correctly the state of its affairs;
- B) explain its transactions and financial position; and
- C) enable the National Bank of Ethiopia to determine whether the Company had complied with the provisions of the Insurance Business Proclamation, regulations and directives issued for the implementation of the aforementioned Proclamation.

The Management is responsible for the maintenance of accounting records that may be relied upon in the preparatation of the financial statements as well as adequate systems of internal control.

The Board of Directors (the Board) submits to the Auditors the annual financial statements which have been prepared by the Management using appropriate accounting policies supported by reasonable and prudent judgments and estimates, in conformity with International Financial Reporting Standards, Insurance Business Proclamation, Commercial Code of 2021 as well as the requirements of the Accounting and Auditing Board of Ethiopia and the relevant Directives issued by the National Bank of Ethiopia.

The Board is of the opinion that the financial statements give a true and fair view of the state of the financial affairs of the Company and of its profit or loss.

Nothing has come to the attention of the Board to indicate that the Company will not remain a going concern for at least twelve months from the date of this statement.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF AWASH INSURANCE COMPANY S.C.

Opinion

We have audited the financial statements of Awash Insurance Company S.C, which comprise the statement of the financial position as at 30 June, 2021, and the statement of profit or loss and other comprehensive Income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give true and fair view of the financial position of the Company as at 30 June 2021 and of its statements of profit or loss and other comprehensive income and its cash flows for the year then ended in accordance with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accounts (IESBA Code) together with the ethical requirmets that are relevant to our audit of the financil statmetns in Ethiopia, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Responsibilities of the Management and those Charged with Governance for the Financial Statements

The Management is responsible for the preparation and fair presentation of the financial statements in accordance with the accounting policies of the Company and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting unless Management either intends to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Company report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise form fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design
 audit procedures that are appropriate in the circumstances, but not for the purpose of
 expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to

modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

 Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonable be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statement of the current period and are therefore the key audit matters. We describe these, matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Based on our duties and methodologies we used stated under the basis for opinion paragraph above, We have not any observed reportable matters to make on the reports of the Board of Directors and the proposed distributable dividends so far as it relates to the financial statements and pursuant to Article 349 of the Commercial Code of Ethiopia 2021 proclamation 1243 and we recommend approval of the financial statements.

The engagement partner on the audit resulting in this independent auditor's report is Ato

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

1 General information

Awash Insurance Company S.C. ("the Company") is a private commercial insurance company domiciled in Ethiopia. The Company was established on 1 October 1994 in accordance with the provisions of the Commercial Code of Ethiopia in conformity with International Financial Reporting Standards and in the manner required by the Commercial Code of Ethiopia, Proclamation No. 1243/2021 and sebsequently by the Insurance Business Proclamation No.746/2012 as amended by the Insurance Business (Amendment) Proclamation No.1163/2019. The registered office is at:

Awash Towers, Ras Abebe Aregay Street, Addis Ababa, Ethiopia.

The Company is principally engaged in the provision of general and life insurance services to clients in Ethiopian market.

2 Summary of significant accounting policies

2.1 Introduction to summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.2 Basis of preparation

The financial statements for the year ended 30 June 2020 have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). Additional information required by Ethiopian laws including Insurance Business Proclamation No. 746/2012, as amended by the Insurance Business (Amendment) Proclamation No.1163/2019 and Financial Reporting Proclamation No. 847/2014 are included where appropriate.

The financial statements comprise the statement of profit or loss and other comprehensive income, the statement of financial position, the statement of changes in equity, the statement of cash flows and the notes to the financial statements.

The financial statements have been prepared in accordance with the going concern principle under the historical cost concept except for investment properties, buildings and vehicles which are measured at fair value at deemed cost.

All values are rounded to the nearest thousand, except when otherwise indicated. The financial statements are presented in thousands of Ethiopian Birr (Birr' 000).

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires Management to exercise its judgment in the process of applying the Company's accounting policies. Changes in assumptions may have a significant impact on the financial statements in the period the assumptions changed. Management believes that the underlying assumptions are appropriate and that the Company's financial statements therefore present the financial position and results fairly.

The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in Note 3.

2.2.1 Going concern

The financial statements have been prepared on a going concern basis. The Management has no doubt that the Company would remain in existence after 12 months.

2.2.2 Changes in accounting policies and disclosures

New Standards, amendments, interpretations issued but not yet effective.

A number of new standards and amendments to standards and interpretations are effective for annual periods beginning after 30 June 2019, and have not been applied in preparing these financial statements. None of these is expected to have a significant effect on the financial statements of the Company, except the following set out below:

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

IFRS 9 - Financial Instruments

IFRS 9, published in July 2014, replaces the existing guidance in IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 replaces the multiple classification and measurement models in IAS 39 with a single model that has only three classification categories: amortised cost, fair value through OCI and fair value through profit or loss.

IFRS 9 includes revised guidance on the classification and measurement of financial instruments, including a new expected credit loss model for calculating impairment on financial assets, and the new general hedge accounting requirements. It also carries forward the guidance on recognition and derecognition of financial instruments from IAS 39. IFRS 9 is effective for annual reporting periods beginning on or after 1 January 2018, with early adoption permitted.

There is now a new expected credit losses model that replaces the incurred loss impairment model used in IAS 39. For financial liabilities there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss.

IFRS 9 relaxes the requirements for hedge effectiveness by replacing the bright line hedge effectiveness tests. It requires an economic relationship between the hedged item and hedging instrument and for the 'hedged ratio' to be the same as the one Management actually use for risk management purposes. Contemporaneous documentation is still required but is different to that currently prepared under IAS 39.

In September 2016 IFRS 4 was amended by applying IFRS 9 Financial Instruments with IFRS 4, Insurance Contracts. These amendments address concerns arising from the different effective dates of IFRS 9 and the forthcoming insurance contracts Standard. Accordingly, these amendments introduce two optional approaches: an overlay approach and temporary exemption from applying IFRS 9, deferral approach if an insurer's activities are predominantly connected with insurance. Accordingly, the Company determined to choose temporary exemption until it applies IFRS 17 since its insurance contract liabilities is 90% of the total carrying amount of liabilities (excluding deferred taxes) as at 30 June 2021. Early adoption of the standard is permitted. The Company is yet to assess IFRS 9's full impact.

IFRS 17 - Insurance contracts

IFRS 17 was issued in May 2017 and establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts within the scope of the standard. The objective of IFRS 17 is to ensure that an entity provides relevant information that faithfully represents those contracts. This information gives a basis for users of financial statements to assess the effect that insurance contracts have on the entity's financial position, financial performance and cash flows.

This standard requires a company that issues insurance contracts to report insurance obligations and risks on the balance sheet as the total of:

- (a) the fulfillment cash flows—the current estimates of amounts that the insurer expects to collect from premiums and pay out for claims, benefits and expenses, including an adjustment for the timing and risk of those cash flows; and
- (b) the contractual service margin—the expected profit for providing future insurance coverage (ie unearned profit).

The measurement of the fulfillment cash flows reflects the current value of any interest-rate guarantees and financial options included in the insurance contracts.

The standard replaces IFRS 4 'Insurance contracts'. The standard is effective for annual periods beginning on or after 1 January 2023 and earlier application is permitted. The Company is yet to assess the expected impact on this standard.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

2.3 Foreign currency translations

a) Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the Company operates ('the functional currency'). The functional currency and presentation currency of the Company is the Ethiopian Birr.

b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at exchange rates of monetary assets and liabilities denominated in currencies other than the Company's functional currency are recognized in profit or loss within other (loss)/ income. Monetary items denominated in foreign currency are translated using the closing rate as at the reporting date.

Foreign currency translation

Changes in the fair value of monetary securities denominated in foreign currency classified as available for sale are analyzed between translation differences resulting from changes in the amortized cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in amortized cost are recognized in profit or loss, and other changes in carrying amount are recognized in other comprehensive income.

Translation differences on non-monetary financial assets and liabilities such as equities held at fair value through profit or loss are recognized in profit or loss as part of the fair value gain or loss. Translation differences on non-monetary financial assets measure at fair value, such as equities classified as available for sale, are included in other comprehensive income.

2.4 Cash and cash equivalents

Cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition, including cash in hand, deposits held at call with Banks and other short-term highly liquid investments with original maturities of three months or less.

For the purposes of the cash flow statement, cash and cash equivalents include cash in hand and cash at bank.

2.5 Financial instruments - initial recognition and subsequent measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

2.5.1 Financial assets

Initial recognition and measurement

All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

Subsequent measurement

For purposes of subsequent measurement, the Company's financial assets are classified into two categories:

- · Loans and receivables, and
- · Available for sale

a) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in interest and similar income in income statement. The losses arising from impairment are recognized in income statement in loan impairment charge.

The Company's loans and receivables comprise of insurance receivables, investment securities and other financial assets. Receivables arising from insurance contracts are classified in this category and are reviewed for impairment as part of the impairment review of loans and receivables.

b) Available-for-sale (AFS) financial assets

AFS investments include equity investments. Equity investments classified as AFS are those which are neither classified as held for trading nor designated at fair value through profit or loss.

After initial measurement, AFS financial investments are subsequently measured at fair value with unrealized gains or losses recognized in other comprehensive income and credited in the AFS reserve until the investment is derecognized, at which time the cummulative gain or loss is recognized in other operating income, or the investment is determined to be impaired, when the cummulative loss is reclassified from the AFS reserve to income statement in impairment loss on financial instruments. Interest earned whilst holding AFS financial investments is reported as interest and similar income using the EIR method. Unquoted equity securities whose fair value cannot be reliably measured are carried at cost.

The Company evaluates whether the ability and intention to sell its AFS financial assets in the near term is still appropriate. When the Company is unable to trade these financial assets due to inactive markets, the Company may elect to reclassify these financial assets held to maturity if the Management has the ability and intention to hold the assets for foreseeable future or until maturity.

'Day 1' profit or loss

When the transaction price differs from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable markets, the Company immediately recognizes the difference between the transaction price and fair value (a 'Day 1' profit or loss) in 'Other operating income'.

In cases where fair value is determined using data which is not observable, the difference between the transaction price and model value is only recognized in the profit or loss when the inputs become observable, or when the instrument is derecognized.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

Reclassification of financial assets

Reclassification is at the election of Management, and is determined on an instrument by instrument basis. The Company does not reclassify any financial instrument into the fair value through profit or loss category after initial recognition.

For a financial asset reclassified out of the AFS category, any previous gain or loss on that asset that has been recognized in equity is amortized to income statement over the remaining life of the investment using the EIR. Any difference between the new amortized cost and the expected cash flows is also amortized over the remaining life of the asset using the EIR. If the asset is subsequently determined to be impaired then the amount recorded in equity is reclassified to income statement.

The Company may reclassify a non-derivative trading asset out of the 'held-for-trading' category and into the 'loans and receivables' category if it meets the definition of loans and receivables and the Company has the intention and ability to hold the financial asset for the foreseeable future or until maturity.

If a financial asset is reclassified, and if the Company subsequently increases its estimates of future cash receipts as a result of increased recoverability of those cash receipts, the effect of that increase is recognized as an adjustment to the EIR from date of change in estimate.

Derecognition of financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Company's statement of financial position) when:

- the rights to receive cash flows from the asset have expired, or
- the Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the
 received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either
 - (a) the Company has transferred substantially all the risks and rewards of the asset, or
- (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Derecognition of financial assets

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Impairment of financial assets

The Company assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. An impairment exists if one or more events that has occurred since the initial recognition of the asset (an incurred 'loss event'), has an impact on the estimated future cash flows of the financial asset or the Company of financial assets that can be reliably estimated.

Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, the probability that they will enter bankruptcy or other financial reorganisation, default or delinquency in interest or principal payments and where observable data indicates that there is measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

(i) Financial assets carried at amortised cost

For financial assets carried at amortised cost (such as loans and receivables), the Company first assesses individually whether objective evidence of impairment exists for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Company determines that no objective evidence of impairment exists for an individually assessed financial asset, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in income statement. Interest income continues to be accrued on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

The interest income is recorded as part of 'Interest and similar income'. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the Company. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a future write—off is later recovered, the recovery is credited to the 'loan impairment charge'.

The present value of the estimated future cash flows is discounted at the financial asset's original EIR. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current EIR.

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

(i) Financial assets carried at amortised cost

For the purpose of collective evaluation of impairment, financial assets are grouped on the basis of the Company's internal credit grading system, that considers credit risk characteristics such as asset type, industry, geographical location, collateral type, past—due status and other relevant factors.

Future cash flows on a group of financial assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the Company.

Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently. Estimates of changes in future cash flows reflect, and are directionally consistent with, changes in related observable data from year to year (such as changes in unemployment rates, property prices, commodity prices, payment status, or other factors that are indicative of incurred losses in the Company and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

(ii) Available-for-sale (AFS) financial assets

AFS financial assets are impaired if there is objective evidence of impairment, resulting from one or more loss events that occurred after initial recognition but before the reporting date, that have an impact on the future cash flows of the asset. In addition, an available-for-sale equity instrument is generally considered impaired if a significant or prolonged decline in the fair value of the instrument below its cost has occurred. Where an available-for-sale asset, which has been remeasured to fair value directly through equity, is impaired, the impairment loss is recognised in profit or loss. If any loss on the financial asset was previously recognised directly in equity as a reduction in fair value, the cummulative net loss that had been recognised in equity is transferred to profit or loss and is recognised as part of the impairment loss. The amount of the loss recognised in profit or loss is the difference between the acquisition cost and the current fair value, less any previously recognised impairment loss.

If, in a subsequent period, the amount relating to an impairment loss decreases and the decrease can be linked objectively to an event occurring after the impairment loss was recognised, where the instrument is a debt instrument, the impairment loss is reversed through profit or loss. An impairment loss in respect of an equity instrument classified as available-for-sale is not reversed through profit or loss but accounted for directly in equity.

2.5.2 Financial liabilities

Initial recognition and measurement

All financial liabilities of the Company are classified as other financial liabilities at amortised cost.

They are recognised initially at fair value, net of directly attributable transaction costs and include insurance payables, dividend payables and other account payables.

Subsequent measurement

After initial measurement, the Company's financial liabilities are subsequently measured at amortised cost using the Effective Interest Rate (EIR). Amortised cost is calculated by taking into account any discount or premium on the issue and costs that are an integral part of the EIR.

Derecognition of financial liabilities

Financial liabilities are derecognised when they have been redeemed or otherwise extinguished.

2.5.3 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position where the Company has a legally enforceable right to offset the recognised amounts, and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legal enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in event of default, insolvency or bankruptcy of the company or the counterparty.

2.6 Reinsurance assets

The Company cedes business to reinsurers in the normal course of business for the purpose of limiting its net loss potential through the transfer of risks as described in note 2.15. Premium ceded comprise gross written premiums. Reinsurance arrangements do not relieve the Company from its direct obligations to its policy holders.

Reinsurance assets are recognized when the related gross insurance claim is recognized according to the terms of the relevant contract. The Company has the right to set off reinsurance payables against amounts due from reinsurers in line with the agreed arrangements between both parties.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

2.7 Other assets

These are other receivables and prepayments. Other receivables are stated after deductions of amount considered bad or doubtful of recovery. These are loans and receivables other than investment securities, insurance trade receivables and reinsurance assets. When a debt is deemed not collectible, it is written-off against the related provision or directly to profit or loss account to the extent not previously provided for. Any subsequent recovery of written-off debts is credited to profit or loss.

The Company's other receivables are rent receivables, staff debtors and other account receivables.

Prepayments are payments made in advance for services to be enjoyed in future. The amount is initially capitalized in the reporting period in which the payment is made and subsequently amortised over the period in which the service is to be enjoyed. They include prepaid rent, prepaid staff expenses and other prepaid office expenses.

2.8 Deferred acquisition costs (DAC)

Commissions and other acquisition costs that vary with and are related to securing new contracts and renewing existing contracts are capitalised. All other costs are recognised as expenses when incurred. The DAC is subsequently amortised over the life of the contracts as follows:

- For property, casualty and short-duration life insurance contracts, DAC is amortised over the terms of the policies as premium is earned;
- For long-term insurance contracts, DAC is amortised in line with premium revenue using assumptions consistent with those used in calculating future policy benefit liabilities.

Deferred acquisition costs represent a portion of commission which are incurred during a financial year and are deferred to the extent that they are recoverable out of future revenue margins by applying to the acquisition expenses the ratio of unearned premium to written premium.

DACs are derecognised when the related contracts are either settled or disposed of.

2.9 Leases

The determination of whether an arrangement is a lease, or contains a lease, is based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets or whether the arrangement conveys a right to use of asset.

Company as a lessee

Leases that do not transfer to the Company substantially all of the risks and benefits incidental to ownership of the leased items are right of use assets. Payments for right of use assets are recognised as an expense in the income statement on a straight-line basis over the lease term. Contingent rental payable is recognised as an expense in the period in which it is incurred.

Company as a lessor

Leases where the Company does not transfer substantially all of the risk and benefits of ownership of the asset are classified as operating leases. Rental income is recorded as earned based on the contractual terms of the lease in Other operating income. Initial direct costs incurred in negotiating operating leases are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

2.10 Property, plant and equipment

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the property, plant and equipment if the recognition criteria are met. When significant parts of property, plant and equipment are required to be replaced at intervals, the Company recognises such parts as individual assets with specific useful lives and depreciates them accordingly. All other repair and maintenance costs are recognised in income statement as incurred.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised.

Depreciation is calculated using the straight-line method to allocate their cost less their residual values over their estimated useful lives, as follows:

Asset class Depreciation (in years) Residual value (%) Buildings 50 Lift 15 1% Motor vehicles 10 Furniture & fittings 10 1% Computer equipment 7 1% Office equipment 1%

The Company commences depreciation when the asset is available for use.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in income statement when the asset is derecognised.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

2.11 Investment property

Properties that are held for rent by the Company to earn rental income or for capital appreciation, or both, and are not occupied by the Company, are classified as investment properties.

Recognition of investment properties takes place only when it is probable that the future economic benefits that are associated with the investment property will flow to the Company and the cost can be reliably measured. This is usually when all risks are transferred.

Investment properties are measured initially at cost, including transaction costs. The Company has opted to subsequently carry investment property at cost and disclose fair value. Fair value of investment property is the price that would be received from sale of the asset in an orderly transaction, without deduction of any transaction costs. Fair value of the Company's investment property is determined by the independent valuers who have recent experience in the location and category of the investment property being valued.

The fair value of investment property reflects, among other things, rental income from current leases and assumptions about rental income from future leases in the light of current market conditions.

Earned rental income is recorded in profit or loss for the year within (other operating income). Gains and losses resulting from changes in the fair value of investment property are recorded in profit or loss for the year and presented separately.

Investment properties are derecognised when they are disposed.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

2.12 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses, if any. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in income statement in the period in which the expenditure is incurred.

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year-end. Changes in the expected useful life, or the expected pattern of consumption of future economic benefits embodied in the asset, are accounted for by changing the amortisation period or methodology, as appropriate, which are then treated as changes in accounting estimates. The amortisation expenses on intangible assets with finite lives is presented in income statement.

Amortisation is calculated using the straight–line method to write down the cost of intangible assets to their residual values over their estimated useful lives, as follow:

Intangible assets class Computer software Useful lives (years)

S

2.13 Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the income statement.

2.14 Statutory deposits

Statutory deposits are cash balances held with the National Bank of Ethiopia in line with Article 20 of Insurance Business Proclamation No. 746/2012 and may not be withdrawn except with the written permission of the National Bank of Ethiopia, or be used as a pledge or security for any loan. They have been separately disclosed due to their nature and liquidity. Statutory deposits are measured at cost.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

2.15 Insurance contracts

Classification

The Company enters into insurance contracts as its primary business activity. Insurance contracts are those that the Company accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder or other beneficiary, if a specified uncertain future event (the insured event) adversely affects the policyholder or the other beneficiary.

The Company's insurance contracts are classified into two main categories, depending on the duration of risk.

(i) Non-life insurance contracts

These contracts are accidents and casualty and property insurance contracts.

Accidents and casualty insurance contracts protect the Company's customers against the risk of causing harm to third parties as a result of their legitimate activities. Damages covered include both contractual and non-contractual events. The typical protection offered is designed for employers who become legally liable to pay compensation to injured employees (employers' liability) and for individual and business customers who become liable to pay compensation to a third party for bodily harm or property damage (public liability).

Property insurance contracts mainly compensate the Company's customers for damage suffered to their properties or for the value of property lost. Customers who undertake commercial activities on their premises could also receive compensation for the loss of earnings caused by the inability to use the insured properties in their business activities.

(ii) Life insurance contracts

These contracts insure events associated with human life (for example, death or survival) over a long duration.

In addition, the Company has short-term life insurance contracts which protect the Company's policyholders from the consequences of events (such as death or disability) that would affect the ability of the insured or his/ her dependants to maintain their current level of income. Guaranteed benefits paid on occurrence of the specified insurance event are either fixed or linked to the extent of the economic loss suffered by the insured or the beneficiary. In such cases, there are no maturity or surrender benefits.

Liability adequacy test

At each end of the reporting period, liability adequacy tests are performed to ensure the adequacy of the contract liabilities net of related DAC. In performing these tests, current best estimates of future contractual cash flows and claims handling and administration expenses, as well as investment income from the assets backing such liabilities, are used. Any deficiency is immediately charged to profit or loss initially by writing off DAC and by subsequently establishing a provision for losses arising from liability adequacy tests (the unexpired risk provision).

As set out under note 4.2, life insurance contracts are measured based on assumptions set out at the inception of the contract. When the liability adequacy test requires the adoption of new best estimate assumptions, such assumptions (without margins for adverse deviation) are used for the subsequent measurement of these liabilities. Any DAC written off as a result of this test cannot subsequently be reinstated.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

Reinsurance contracts held

Contracts entered into by the Company with reinsurers under which the Company is compensated for losses on one or more contracts issued by the Company and that meet the classification requirements for insurance contracts in Note 2.15 are classified as reinsurance contracts held. Contracts that do not meet these classification requirements are classified as financial assets. Insurance contracts entered into by the Company under which the contract holder is another insurer (inwards reinsurance) are included with insurance contracts.

The benefits to which the Company is entitled under its reinsurance contracts held are recognised as reinsurance assets. These assets consist of short-term balances due from reinsurers, as well as longer term receivables that are dependent on the expected claims and benefits arising under the related reinsured insurance contracts. Amounts recoverable from or due to reinsurers are measured consistently with the amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract. Reinsurance liabilities are primarily premiums payable for reinsurance contracts and are recognised as an expense when due. The Company had the right to set-off reinsurance payables against the amount due from reinsurance in line with the agreed arrangement between both parties.

In certain cases, a reinsurance contract is entered into retrospectively to reinsure a notified claim under the Company's property or accident and casualty insurance contracts. Where the premium due to the reinsurer differs from the liability established by the Company for the related claim, the difference is amortised over the estimated remaining settlement period.

The Company assesses its reinsurance assets for impairment on an annual basis. If there is objective evidence that the reinsurance asset is impaired, the Company reduces the carrying amount of the reinsurance asset to its recoverable amount and recognizes that impairment loss in the income statement. The Company gathers the objective evidence that a reinsurance asset is impaired using the same process adopted for financial assets held at amortized cost. The impairment loss is calculated following the same method used for these financial assets. These processes are described in Note 2.5.

Deferred income

Deferred income represents a portion of commission received on reinsurance contracts which are booked during the financial year and are deferred to the extent that they are recoverable out of future revenue margins. It is calculated by applying the reinsurance commission income to the ratio of prepaid reinsurance to reinsurance cost.

Receivables and payables related to insurance contracts

Receivables and payables are recognized when due and measured on initial recognition at the fair value. Subsequent to initial recognition, insurance receivables and payables are measured at amortized cost, using the effective interest rate method as described in note 2.5 and 2.17. These include amounts due to and from agents, brokers and insurance contract holders. If there is objective evidence that the insurance receivable is impaired, the Company reduces the carrying amount of the insurance receivable accordingly and recognizes that impairment loss in the income statement. The Company gathers the objective evidence that an insurance receivable is impaired using the same process adopted for loans and receivables.

The impairment loss is calculated under the same method used for these financial assets. These processes are described in Note 2.5.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

Salvage and subrogation reimbursements

Some insurance contracts permit the Company to sell (usually damaged) property acquired in settling a claim (for example, salvage). The Company may also have the right to pursue third parties for payment of some or all costs (for example, subrogation). Estimates of salvage recoveries are included as an allowance in the measurement of the insurance claims paid, and salvage property is recognized in recovery properties held for sale. The allowance is the amount that can reasonably be recovered from the disposal of the property.

Subrogation reimbursements are also considered as an allowance in the measurement of the insurance claims paid and are recognized in other assets. The allowance is the assessment of the amount that can be recovered from the action against the liable third party.

2.16 Insurance contracts liabilities

The recognition and measurement of insurance contracts have been set out under Note 2.15. Insurance contract liabilities arising from insurance contracts are determined as follows:

(i) Non-life insurance contracts

(a) Reserves for outstanding claims

The reserve for outstanding claims is maintained at the total amount of outstanding claims incurred and reported plus claims incurred but not reported ("IBNR") as at the balance sheet date. The IBNR is based on the liability adequacy test described in note 2.15.

(b) Reserves for unearned premium and unexpired risk

The reserve for unearned premium is calculated on a time apportionment basis in respect of risk accepted during the year. A provision for additional unexpired risk reserve is recognised for an underwriting year where it is envisaged that the estimated cost of claims and expenses would exceed the unearned premium reserve.

At the end of each reporting period, proportions of net retained premium of the general insurance are provided to cover portions of risks which have not expired. The reserves are calculated on 1/24th method as prescribed by the Directive of the National Bank of Ethiopia.

(c) Reserving methodology

Data segmentation: The data used for reserving is segmented into the following classes as per the NBE Directives:

- Motor vehicle insurance business;
- Fire insurance business;
- Personal accident insurance business;
- · Marine insurance business;
- · Workmens' compensation insurance business;
- Engineering;
- Goods in transits:
- $\bullet \ Public \ liability, pecuniary, Political \ Violence \ and \ Terrorism (PVT) \ and \ other \ miscellaneous \ insurances.$

(ii) Life insurance contracts

This is made up of net liabilities on policies in force as determined by qualified actuaries at the reporting date. Surplus or deficit arising from the periodic valuation of the life insurance contracts are recognised in the statement of profit and loss.

The reserves include Incurred But Not Reported (IBNR) and Unearned Premium Reserve (UPR).

Reserving methodology

Data segmentation: The data used for reserving is segmented into two classes as follows:

- · Individual business; and
- · Group business.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

2.17 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in income statement net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as other operating expenses.

2.18 Insurance payables

Insurance payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method. The fair value of a non-interest bearing liability is its discounted repayment amount. If the due date is less than one year, discounting is omitted as the impact is not expected to be significant.

2.19 Other payables

Other payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method. The fair value of a non-interest bearing liability is its discounted repayment amount. If the due date is less than one year, discounting is omitted as the impact is not expected to be significant.

2.20 Share capital

The Company classifies ordinary shares as equity when there is no obligation to transfer cash or other assets. Incremental costs directly attributable to the issue of new shares are recognized as deductions from equity, net of tax, from the proceeds. The excess of the issue price over the par value is recorded in the share premium reserve.

2.21 Retained earnings

The net profits or losses from operations in current and prior periods are accumulated in retained earnings less distributions to equity holders.

2.22 Legal reserves

In accordance with Article 22 sub articles (1) and (2),of Insurance Business Proclamation No 746/2012, the Company, at the end of each financial year, transfers to its legal reserve to account a sum of not less than 10% of profit. When the legal reserve becomes equal to the paid-up capital of the Company, the amount of the legal reserve to be retained by the Company each year from its net profit shall be determined by NBE's directive.

2.23 Dividend

Dividends are recorded in equity in the period in which they are declared. Any dividends declared after the end of the reporting period and before the financial statements are authorised for issue, are disclosed in the subsequent events note. The statutory accounting reports of the Company are the basis for profit distribution and other appropriations.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

2.24 Revenue recognition

Gross premiums

Gross recurring premiums on life and investment contracts with DPF are recognised as revenue when payable by the policyholder. For single premium business, revenue is recognised on the date on which the policy is effective. Gross general insurance written premiums comprise the total premiums receivable for the whole period of cover provided by contracts entered into during the reporting period. They are recognised on the date on which the policy commences. Premiums include any adjustments arising in the reporting period for premiums receivable in respect of business written in prior accounting periods. Rebates that form part of the premium rate, such as no claim rebates, are deducted from the gross premium; others are recognised as an expense.

Unearned premiums are those proportions of premiums written in a year that relate to periods of risk after the reporting date. Unearned premiums are calculated on a daily pro rata basis. The proportion attributable to subsequent periods is deferred as a provision for unearned premiums and it's computed based on the 1/24th method as prescribed in the Directives of the National Bank of Ethiopia.

Reinsurance premiums

Gross outward reinsurance premiums on life and investment contracts are recognised as an expense on the earlier of the date when premiums are payable or when the policy becomes effective.

Gross general reinsurance premiums ceded comprise the total premiums payable for the whole cover provided by contracts entered into in the period and are recognised on the date on which the policy incepts. Premiums include any adjustments arising in the accounting period in respect of reinsurance contracts incepting in prior accounting periods.

Unearned reinsurance premiums are those proportions of premiums ceded in a year that relate to periods of risk after the reporting date. Unearned reinsurance premiums are deferred over the term of the underlying direct insurance policies for risks-attaching contracts and over the term of the reinsurance contract for losses- occurring contracts.

Reinsurance premiums and claims on the face of the statement of profit or loss have been presented as negative items within premiums and net benefits and claims, respectively, because this is consistent with how the business is managed.

Fees and commission income

Insurance and investment contract policyholders are charged for policy administration services, investment management services, surrenders and other contract fees. These fees are recognised as revenue over the period in which the related services are performed. If the fees are for services provided in future periods, then they are deferred and recognised over those future periods.

Investment income

Interest income is recognised in the statement of profit or loss as it accrues and is calculated by using the EIR method. Fees and commissions that are an integral part of the effective yield of the financial asset are recognised as an adjustment to the EIR of the instrument.

Investment income also includes dividends when the right to receive payment is established.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

Dividend income

This is recognised when the Company's right to receive the payment is established, which is generally when the shareholders approve and declare the dividend.

2.25 Gross benefits and claims

Gross benefits and claims for life insurance contracts and for investment contracts with DPF include the cost of all claims arising during the year, including internal and external claims handling costs that are directly related to the processing and settlement of claims and policyholder bonuses declared on DPF contracts. Changes in the gross valuation of insurance and investment contract liabilities with DPF are also included. Death claims and surrenders are recorded on the basis of notifications received. Maturities and annuity payments are recorded when due.

General insurance and health claims include all claims occurring during the year, whether reported or not, related internal and external claims handling costs that are directly related to the processing and settlement of claims, a reduction for the value of salvage and other recoveries, and any adjustments to claims outstanding from previous years.

2.26 Claims recovered from reinsurers

Reinsurance claims are recognised when the related gross insurance claim is recognised according to the terms of the relevant contract.

2.27 Finance cost

Interest paid is recognised in the statement of profit or loss as it accrues and is calculated by using the EIR method. Accrued interest is included within the carrying value of the interest bearing financial liability.

2.28 Underwrting expenses

Underwriting expenses are made up of acquisition and maintenance expenses comprising commission and policy expenses and other direct costs.

Underwriting expenses for insurance contracts are recognized as expense when incurred, with the exception of acquisition costs which are recognized on a time apportionment basis in respect of risk.

2.29 Employee benefits

(a) Wages, salaries and annual leave

Wages, salaries, bonuses, other contributions, paid annual leave and sick leave are accrued in the year in which the associated services are rendered by employees of the Company.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

(b) Defined contribution plan

The Company operates two defined contribution plans;

- i) pension scheme in line with the provisions of Private Organisation Employees Pension Proclamation No. 715/2011. Funding under the scheme is 7% and 11% by employees and the Company respectively;
- ii) provident fund contribution, funding under this scheme is 8% and 15% by employees and the Company respectively based on the employees' salary.

Once the contributions have been paid, the Company retains no legal or constructive obligation to pay further contributions if the Fund does not hold enough assets to finance benefits accruing under the retirement benefit plan. The Company's obligations are recognized in the profit and loss account.

(c) Defined benefit obligations

The Company operates a defined benefit severance scheme in Ethiopia, where members of staff who have spent 5 years or more in service of the Company are entitled to benefit payments upon retirement. The benefit payments are based on final emolument of staff and length of service. A defined benefit plan is a pension plan that is not a defined contribution plan. Typically defined benefit plans define an amount of gratuity benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

The liability recognised in respect of defined benefit gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using the market rates on government bonds that have terms to maturity approximating to the terms of the related pension obligation.

Company's contributions to this scheme are charged to profit or loss in the year in which they relate.

Remeasurement gain and loss arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise.

Current service and interest cost are included as part of employee benefit expense in the profit or loss.

Past-service costs are recognised immediately in profit or loss.

Gains or losses on curtailment or settlement are recognised in profit or loss when the curtailment or settlement occurs.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

2.30 Fair value measurement

The Company measures financial instruments classified as available-for-sale at fair value at each statement of financial position date. Fair value related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed are, summarised in the following notes:

- · Disclosures for valuation methods, significant estimates and assumptions Note 4.7.1 and Notes 3
- · Quantitative disclosures of fair value measurement hierarchy Note 4.7.2
- Financial instruments (including those carried at amortised cost) Note 4.7.3

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- · In the principal market for the asset or liability, or
- · In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is
 directly or indirectly observable.
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Company's Management determines the policies and procedures for both recurring fair value measurement, such as available-for-sale financial assets.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

2.31 Earnings per share

The Company presents basic and diluted earnings per share (EPS) for its ordinary shares. Basic EPS are calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of shares outstanding during the period.

Diluted EPS is determined by adjusting the profit of loss attributable to ordinary shareholders and weighted average number of ordinary shares outstanding for the efforts of all diluted potential ordinary shares.

2.32 Income taxation

(a) Current income tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in Ethiopia. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

(b) Deferred tax

Deferred tax is recognised on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill; deferred tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss.

Deferred tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

3 Significant accounting judgments, estimates and assumptions

The preparation of the Company's financial statements requires Management to make judgments, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities, and the accompanying disclosures, as well as the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Other disclosures relating to the Company's exposure to risks and uncertainties include:

- Capital management Note 4.7
- Financial risk management and policies Note 4
- · Sensitivity analyses disclosures Note 4.5.2

3.1 Judgments

In the process of applying the Company's accounting policies, Management has made the following judgments, which have the most significant effect on the amounts recognised in the financial statements:

Right of use asset

The Company leases land for its office buildings and investment properties and rents office buildings. Land leases are made

for fixed period of 36-60 years. Office rents are made for fixed period of 1-5 years and in most cases they are renewable. All Company's right of use asset are supported by lease agreements. The lease amounts of these agreements are fully settled except one new land lease agreement which is partially paid. The land lease liability for partial payment is measured at amortized cost using the interest rate specified on lease agreement. The right-of-use assets are depreciated on

a straight-line basis over the lease period. For all other leases, the right of use asset were measured as equal to the lease liability and adjusted for any accruals or prepayments on the balance sheet.

3.2 Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

(a) Valuation of insurance contract liabilities

Life insurance contract liabilities

The liability for life insurance contracts is either based on current assumptions or on assumptions established at the inception of the contract, reflecting the best estimate at the time together with a margin for risk and adverse deviation. All contracts are subject to a liability adequacy test which reflects Management's best current estimate of future cash flows.

These liabilities are estimated using appropriate and acceptable base tables of standard mortality according to the type of contract being written. Management makes various assumptions such as expenses inflation and mortality in estimating the required liabilities for life contracts.

Non-life insurance contract liabilities

For non-life insurance contracts, estimates have to be made both for the expected ultimate cost of claims reported at the reporting date and for the expected ultimate cost of claims incurred, but not yet reported, at the reporting date (IBNR). It can take a significant period of time before the ultimate claims cost can be established with certainty and for some type of policies, IBNR claims form the majority of the liability in the statement of financial position.

The ultimate cost of outstanding claims is estimated by using a standard actuarial claims projection techniques: Chain Ladder.

The main assumption underlying this technique is that a Company's past claims development experience can be used to project future claims development and, hence, the ultimate claims costs. As such, the method extrapolates the development of paid and incurred losses, average costs per claim and claim numbers based on the observed development of earlier years and expected loss ratios. Historical claims development is mainly analysed by accident years, but can also be further analysed by geographical area, as well as by significant business lines and claim types. In most cases, no explicit assumptions are made regarding future rates of claims inflation or loss ratios. Instead, the assumptions used are those implicit in the historical claims development data on which the projections are based.

Similar judgments, estimates and assumptions are employed in the assessment of adequacy of provisions for unearned premium.

(b) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the statement of financial position cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the discounted cash flow (DCF) model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See Note 4.7.2 for further disclosures.

(c) Taxes

Uncertainties exist with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income. Given the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The amount of such provisions is based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority.

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant Management's judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

(d) Impairment of insurance receivables

The Company assesses at the end of every reporting period whether there is any objective evidence that its premium receivable is impaired. The Company determines whether impairment losses are incurred if and only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the receivable (a "loss event") and that loss event (or events) has an impact on the estimated future cash flows of the receivable that can be reliably estimated, or a trigger event is identified.

The following impairment triggers have been set by the Company:

- (a) significant financial difficulty of the premium debtor;
- (b) significant financial difficulty of the reinsurance broker;
- (c) a breach of agreements, such as payment defaults or delinquency in premium payments;
- (d) Economic, regulatory or legal reasons relating to the premium debtor's financial difficulty, granting to the premium debtor a concession that the Company would not otherwise consider;
- (e) High probability that the premium debtor will enter bankruptcy or other financial reorganization.

If any of the impairment triggers are identified, the Company specifically assesses the receivables for impairment. Where no impairment trigger is identified, or no objective evidence of impairment exists, the Company assesses its receivables collectively for impairment using the historical loss rate model.

The historical loss rate model considers the historical recoveries (cash flows) on premium debts for policies written in prior years, in order to determine the loss given default ratio on outstanding premium as at the reporting date. The model also considers premium receipts subsequent to the reporting date. The loss ratio derived is used to determine the allowance for impairment on premium debts.

This model assumes that all premium debts will be paid until evidence to the contrary (a loss or trigger event) is identified. On the identification of an objective evidence of impairment, the premium debts are subject to specific impairment. Where there is no objective evidence of impairment, the premium debts are subjected to collective impairment.

Collective impairment incorporates the following:

- current and reliable data, Management's experience on credit judgments, and all known relevant internal and external factors that may affect collectability;
- historical loss experience or where institutions have no loss experience of their own or insufficient experience, peer company experience for a comparable company's of financial instruments at amortized cost;
- adjustments to historical loss experiences on the basis of current observable data to reflect the effects of current conditions

(e) Liabilities arising from insurance contracts

Liabilities for unpaid claims are estimated on case by case basis. The reserves made for claims fluctuate are based on the nature and severity of the claim reported. Claims incurred but not reported are determined using statistical analyses and the Company deems the reserves as adequate.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

(f) Retirement benefit obligations

The present value of the retirement benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of severance pay obligations. The assumptions used in determining the net cost (income) include the discount rate, rate of return on assets, future salary increments and mortality rates.

The Company determines the appropriate discount rate at the end of the year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the gratuity obligations. In determining the appropriate discount rate, the Company considers the interest rates of high-quality government bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related liability. Other key assumptions for retirement benefit obligations are based in part on current market conditions.

(g) Depreciation and carrying value of property, plant and equipment

The estimation of the useful lives of assets is based on Management's judgment.

The Company estimates the useful lives of property, plant and equipment based on the period over which the assets are expected to be available for use. Property, plant and equipment is depreciated over its useful life.

Estimates could change if expectations differ due to physical wear and tear and technical or commercial obsolescence. It is possible, however, that future results of operations could be materially affected by changes in the estimates brought about by changes in factors mentioned above. The amounts and timing of expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of the property, plant and equipment would increase expenses and decrease the carrying value of non-current assets.

(h) Impairment of non-financial assets

The Company reviews other non-financial assets for possible impairment if there are events or changes in circumstances that indicate that the carrying values of the assets may not be recoverable, or at least at every reporting date, when there is any indication that the asset might be impaired. The Company is of the opinion that there is no impairment indicator on its non-financial assets as at the reporting date.

(i) Fair valuation of investment properties

The fair value of investment properties is based on the nature, location and condition of the specific asset. The fair value is determined by reference to observable market prices. The fair value of investment property does not reflect the related future benefits from this future expenditure. These valuations are performed by external appraisers. Assumptions are made about expected future cash flows and the discounting rates.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

4 Insurance and financial risk management

4.1 Introduction

Risk is inherent in the Company's activities, but is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is critical to the Company's continuing profitability and each individual within the Company is accountable for the risk exposures relating to his or her responsibilities. The Company is exposed to operational and financial (credit, liquidity and market) risk.

The independent risk control process does not include business risks such as changes in the environment, technology and industry. The Company's policy is to monitor those business risks through the the Company's strategic planning process.

4.1.1 Risk management structure

The Board monitors the overall risk encountered by the Company. The Board is responsible to develop comprehensives risk management program and policies of the Company. The Board has an oversight role on the proper implementation of the Company's risk management program or policies. The Board monitors proper implementation of policies through various reports.

The Management has the overall responsibility for the proper execution and interpretation of the risk strategy and implementing principles, frameworks, policies and limits. It is also responsible for managing risk decisions and monitoring risk levels and submit reports to the Board regarding risk management issues and give timely directions.

The Company's Risk Management Unit is responsible for implementing and maintaining risk related procedures, for assessesing and monitoring the level of risk assumed by the Company. Besides, the Risk Management Unit is responsible for monitoring compliance with risk principles, policies and limits across the Company. It carries out an assessment of risk on periodic basis to monitor the Company's overall risk, including monitoring the risk of exposures against limits and the assessment of risks of new products and structured transactions. Exceptions are reported, where necessary, to the Board's Risk and Compliance Committee and the relevant actions are taken to address exceptions and any areas of weakness. The unit works closely with the Management to ensure that procedures are compliant with the overall framework. The unit is functionally responsible to the Board. The risk Management unit has also closer relationship with internal audit function. Internal audit function among others ensures the effectiveness of the risk management function periodically. Internal audit function discusses the results of its assessments with Management, and reports its findings and recommendations to the Board Audit Committee.

The Company's Finance and Accounts Directorate is responsible for managing the financial assets, financial liabilities and the overall financial structure. It is also primarily responsible for the funding and liquidity risks of the Company.

4.1.2 Risk measurement and reporting systems

The Company's risks are measured using a method that reflects both the expected loss likely to arise in normal circumstances and unexpected losses, which are an estimate of the ultimate actual loss based on statistical model. The models make use of probabilities derived from historical experience, adjusted to reflect the economic environment.

Monitoring and controlling risks is primarily performed based on limits established by the Company. These limits reflect the business strategy and market environment of the Company as well as the level of risk that the Company is willing to accept, with additional emphasis on selected segments. In addition, the Company measures and monitor the overall risk bearing capacity in relation to the aggregate risk exposure across all risk types and activity.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

4.1.3 Risk mitigation

The Company uses various risk mitigating techniques to reduce its risk to the acceptable level. Risk controls and mitigants, identified and approved for the Company, are documented for existing and new processes and systems.

Risk control processes are identified and discussed in the quarterly risk report and Management Risk Committee meetings. Control processes are also regularly reviewed at Business Unit level and changes agreed with the Board.

4.2 Insurance risk

The principal risk the Company faces under insurance contracts is that the actual claims and benefit payments or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of long-term claims. Therefore, the objective of the Company is to ensure that sufficient reserves are available to cover these liabilities.

The risk exposure is mitigated by diversification across a large portfolio of insurance contracts. The variability of risks is also improved by careful selection and implementation of underwriting strategy guidelines, as well as the use of reinsurance arrangements. The Company purchases reinsurance as part of its risks mitigation programme.

Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contracts. Although the Company has reinsurance arrangements, it is not relieved of its direct obligations to its policyholders and thus a credit exposure exists with respect to ceded insurance, to the extent that any reinsurer is unable to meet its obligations assumed under such reinsurance agreements. The Company's placement of reinsurance is diversified such that it is neither dependent on a single reinsurer nor are the operations of the Company substantially dependent upon any single reinsurance contract.

Life insurance contracts

Life insurance contracts offered by the Company include: Individual Life, Individual riders, group term, group medical, group riders, endowment assurance, education endowments and individual mortgage protection.

The main risks that the Company is exposed to are as follows:

- ▶ Mortality risk risk of loss arising due to policyholder death experience being different than expected
- ▶ Morbidity risk risk of loss arising due to policyholder health experience being different than expected
- ► Longevity risk risk of loss arising due to the annuitant living longer than expected
- ► Investment return risk risk of loss arising from actual returns being different than expected
- \blacktriangleright Expense risk risk of loss arising from expense experience being different than expected
- ▶ Policyholder decision risk risk of loss arising due to policyholder experiences (lapses and surrenders) being different than expected.

These risks do not vary significantly in relation to the location of the risk insured by the Company and type of risk insured.

The Company's underwriting strategy is designed to ensure that risks are well diversified in terms of type of risk and level of insured benefits. This is largely achieved through the use of medical screening in order to ensure that pricing takes account of current health conditions and family medical history, regular review of actual claims experience and product pricing as well as detailed claims' handling procedures.

Underwriting limits are in place to enforce appropriate risk selection criteria. For example, the Company has the right not to renew individual policies. Insurance contracts also entitle the Company to pursue third parties for payment of some or all costs.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

The following Tables show the concentration of life insurance contract liabilities by type of contract.

30 June 2021	Gross	Reinsurance	Net
	Birr'000	Birr'000	Birr'000
Individual life	62	-	62
Group life	4,494	(225)	4,269
Group medical	13,952	(8,953)	4,999
Total life insurance	18,508	(9,178)	9,331
30 June 2020	Gross Birr'000	Reinsurance Birr'000	Net Birr'ooo
Individual life	62	- BIT 000	62
Group life	2,822	(819)	2,004
Group medical	4,207	(219)	3,987
Total life insurance	7,091	(1,038)	6,053

Key assumptions

The key assumptions to which the estimation of liabilities is particularly sensitive are as follows:

Expenses

Operating expenses assumptions reflect the projected costs of maintaining and servicing in–force policies and associated overhead expenses. The current level of expenses is taken as an appropriate expense base, adjusted for expected expense inflation if appropriate.

An increase in the level of expenses would result in an increase in expenditure, thereby reducing profits for the shareholders.

► Policyholder decision (lapses and surrender)

Policy termination assumptions are determined using statistical measures based on the Company's experience and vary by product type.

An increase in lapse rates early in the life of the policy would tend to reduce profits for shareholders to the unrecouped initial expenses.

▶ Discount rate

Life insurance liabilities are determined as the sum of the discounted value of the expected benefits and future administration expenses directly related to the contract, less the discounted value of the expected theoretical premiums that would be required to meet these future cash outflows. Discount rates are based on current industry risk rates, adjusted for the Company's own risk exposure.

 $\label{lem:contraction} A \ decrease \ in \ the \ discount \ rate \ will \ increase \ the \ value \ of \ the \ insurance \ liability \ and \ therefore \ reduce \ profits \ for \ the \ shareholders.$

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

Sensitivities

The following analysis is performed for reasonably possible movements in key assumptions with all other assumptions held constant, showing the impact on gross and net liabilities, profit before tax and equity. The correlation of assumptions will have a significant effect in determining the ultimate claims liabilities, but to demonstrate the impact due to changes in assumptions, assumptions had to be changed on an individual basis.

Change in liability

	Change in nath				
			30 June		
		30 June 2021	2020		
	Change in assumptions	Birr'000	Birr'000		
Mortality/morbidity rate	+10%	162,634	108,025		
Investment return	+1%	158,635	105,966		
Expenses	+10%	166,432	109,830		
Lapse and surrenders rate	+20%	159,910	107,607		

		Change in liability		
			30 June	
		30 June 2021	2020	
	Change in assumptions	Birr'000	Birr'000	
Mortality/morbidity rate	-10%	162,470	107,885	
Investment return	-1%	166,954	110,202	
Expenses	-10%	158,673	106,084	
Lapse and surrenders rate	+20%	165,333	108,333	

The above analysis are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated – for example, change in interest rate and change in market values, change in lapses and future mortality.

Non-life insurance contracts

The Company principally issues the following types of general insurance contracts: motor, fire, engineering, liability, marine, general health, pecuniary, burglary, floriculture and Workmens' compensation. Health care contracts provide medical expense coverage to policyholders and are not guaranteed as renewable. Risks under non-life insurance policies usually cover twelve months duration.

For general insurance contracts, the most significant risks arise from accidents. These risks do not vary significantly in relation to the location of the risk insured by the Company, type of risk insured and by industry. The risk exposure is mitigated by diversification across a large portfolio of insurance contracts.

Awash Insurance Company S.C.Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

The table below sets out the concentration of non– life insurance contract liabilities by type of contract: 30 June 2021

	Claims repo	rted	Clai	Claims incurred but not reported			
	Gross	Reinsurance	Net	Gross	Reinsurance	Net	
	Birr'000	Birr'000	Birr'000	Birr'000	Birr'000	Birr'000	
Fire	7,737	(4,570)	3,167	6,593	(436)	6,157

Engineering	17,777	(11,074)	6,703	4,007	(1,291)	2,716	
Public liability	10,401	(2,134)	8,267	6,991	(103)	6,888	
Pecuniary	4,343	(1,161)	3,182	2,643	(1,256)	1,387	
Floriculture	3,426	(3,072)	354	153	-	153	
Political Violence & Terrorism	-	-	-	1,465	-	1,465	
Total non- life insurance	366,085	(44,762)	321,323	121,556	(18,862)	102,694	

Geographical concentration

The geographical concentration of the Company's non–life insurance contract liabilities is in Ethiopia. This is the country where the business is written.

Awash Insurance Company S.C. Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

Key assumptions

The principal assumption underlying the liability estimates is that the Company's future claims development will follow a similar pattern to past claims development experience. This includes assumptions in respect of average claim costs, claim handling costs and claim numbers for each accident year.

		Change in liability		
	Change in assumptions	30 June 2021 Birr'000	30 June 2020 Birr'000	
Average claim cost	+10%	14,104	129,133	
Average number of claims	+10%	14,104	129,133	
		Change in li	ability	
	Change in assumptions	30 June 2021 Birr'000	30 June 2020 Birr'000	
Average claim cost	-10%	-12,913	-128,335	
Average number of claims	-10%	-12,913	-128,335	

Claims Development Table

The following Tables show the estimates of cummulative incurred claims, including both claims notified and IBNR for each successive accident year at each reporting date, together with cumulative payments to date.

Gross non–life insurance contract outstanding claims provision for 2020:

	Accident year	2016 Birr'000	2017 Birr'000	2018 Birr'000	2019 Birr'000	2020 Birr'000	2021 Birr'000	Total Birr'000
	2016	155,690	187,856	193,339	204,001	275,103	390,693	
	2017	85,371	96,725	93,445	127,562	131,257		
	2018	6,721	16,188	17,791	22,125			
	2019	6,870	5,311	4,762

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

4.3 Financial risk

Financial instruments by category

The Company's financial assets are classified into the following measurement categories: available-for-sale and loans and receivables and the financial liabilities are classified into other liabilities at amortised cost.

Financial instruments are classified in the statement of financial position in accordance with their legal form and substance.

The Company's classification of its financial assets is summarised in the Table below:

30 June 2021	Notes	Available- For-Sale Birr'000	Loans and receivables Birr'000	Total Birr'000
Cash and cash equivalents		-	1,231,306	1,231,306

4.4 Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's investment portfolio, long term staff loans and the reliance on reinsurers to make payment when certain loss conditions are met.

For risk management reporting purposes, the Company considers and consolidates all elements of credit risk exposure.

The following policies and procedures are in place to mitigate the Company's exposure to credit risk:

- a) The Company's risk management policy sets out the assessment and determination of what constitutes credit risk for the Company. Compliance with the policy is monitored, exposures and breaches are reported to the Company's Management risk committee. The policy is regularly reviewed for pertinence and for changes in the risk environment.
- **b)** Net exposure limits are set for each counterparty or company of counterparties and industry segment (i.e. limits are set for investments and cash deposits).
- c) The Company further restricts its credit risk exposure by entering into master netting arrangements with counterparties with which it enters into significant volumes of transactions. However, such arrangements do not generally result in an offset of balance sheet assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with such balances is reduced in the event of a default, when such balances are settled on a net basis. The Company's reinsurance treaty contracts involve netting arrangements.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

d) Reinsurance is placed with counterparties that have a good credit rating and concentration of risk is avoided by following policy guidelines in respect of counterparties' limits that are set each year by the Management and are subject to regular reviews. At each reporting date, Management performs an assessment of creditworthiness of reinsurers and updates the reinsurance purchase strategy, ascertaining suitable allowance for impairment.

The Table below shows the maximum exposure to credit risk for the Company's financial assets. The maximum exposure is shown gross, before the effect of mitigation:

4.4.1 Credit quality analysis

(a) Cash and cash equivalents

The credit quality of cash and bank balances and short-term investments are neither past due nor impaired as at 30 June 2021, and are non-rated as they are held in Ethiopian banks. There are no credit rating agencies in Ethiopia. The Company has no cash and cash equivalents that are held in foreign banks.

(b) Investment securities

The Company's investment portfolio is exposed to credit risk through its fixed income and money market instruments. The Company further manages its exposure to credit risk through counterparty risk via established limits as approved by the Directive issued by NBE. All fixed income investments are measured for performance on a quarterly basis and monitored by Management. The credit risk exposure associated with money market investments is low.

(c) Credit quality of reinsurers assets

Reinsurance is placed with counterparties that have a good credit rating and concentration of risk is avoided by following policy guidelines in respect of counterparties' limits that are set each year by the Board of Directors and are subject to regular reviews. At each reporting date, Management performs an assessment of creditworthiness of reinsurars and updates the reinsurance purchase strategy, ascertaining suitable allowance for impairment. Reinsurance treaties are reviewed annually by Management prior to renewal of the reinsurance contract.

Maithan

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

Insurance receivables - neither past due nor impaired

The credit quality of the portfolio of insurance receivables that were neither past due nor impaired can be assessed by reference to the customer's ability to pay based on loss experience. Insurance receivables in this category are receivables from contract holders (government organs) that are past due for less than 30 (thirty) days.

Insurance receivables that have been classified as neither past due nor impaired are assessed on a collective basis.

Other loans and receivables

Other receivables balances constitute, rent receivables, other account receivables and staff debtors. The Company has an internal system of assessing the credit quality of other receivables through established policies and approval systems. The Company constantly monitors its exposure to these receivables via periodic performance review. The Company further manages its exposure to credit risk through deduction of transactions at source. The exposure to credit risk associated with other receivables is low.

4.4.2 Allowance for impairment

The Company establishes an allowance for impairment losses that represents its estimate of incurred losses in its loan portfolio. The main components of this allowance are a specific loss component that relates to individually significant exposures, and a collective loan loss allowance, established for companies of homogeneous assets in respect of losses that have been incurred but have not been identified on receivables subject to individual assessment for impairment.

	30 June	30 June
	2021	2020
	Birr'000	Birr'000
Due from contract holders	22,456	22,295
Other loans and receivables	14,855	8,706
Total allowance for impairment	37,311	31,001

4.5 Liquidity risk

Liquidity risk is the risk that the Company is unable to meet its maturing obligations when they become due, at reasonable cost and in a timely manner. Liquidity risk arises because of the possibility that the Company might be unable to meet its payment obligations when they fall due as a result of mismatches in the timing of the cash flows under both normal and stress circumstances. Such scenarios could occur when funding needed for illiquid asset positions is not available to the Company on

Liquidity risk management in the Company is solely determined by Management, which bears the overall responsibility for liquidity risk. The main objective of the Company's liquidity risk framework is to maintain sufficient liquidity in order to ensure that the Company meets its maturing obligations.

4.5.1 Management of liquidity risk

Cash flow forecasting is performed by the Finance and Accounts Directorate. The Directorate monitors rolling forecasts of liquidity requirements to ensure that it has sufficient cash to meet operational needs.

The Company evaluates its ability to meet its obligations on an ongoing basis. Based on these evaluations, the Company devises strategies to manage its liquidity risk.

Prudent liquidity risk management implies that sufficient cash is maintained and that sufficient funding is available to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to the Company's reputation.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

4.5.2 Maturity analysis of financial liabilities

The Table below analyses the the Company's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date. The cash flows presented are the undiscounted amounts to be settled in future.

30 June 2021	Less than 90 days Birr'000	90 days- 1 year Birr'000	Over 1 year Birr'000	Total Birr'ooo
Insurance contract liabilities	1,327,646			1,327,646

Insurance contract liabilities	1,076,368			1,076,368
Insurance payables	119,480			119,480
Other liabilities	89,219	10,535		99,754
			19477	19,477
Total financial liabilities	1,285,067	10,535	19,477	1,315,079

4.6 Market risk

Market risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market risk factors—such as interest rates, foreign exchange rates, equity prices, credit spreads and their volatilities. Market risk can arise in conjunction with trading and non-trading activities of a financial institutions.

The Company does not ordinarily engage in trading activities as there are no active markets in Ethiopia.

4.6.1 Management of market risk

The main objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

4.6.2 Monitoring of market risk

Market risk is monitored by the Risk Management Unit regularly, to identify any adverse movement in the underlying variables.

(i) Interest rate risk

Interest rate risk is the risk that the value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Exposure to this risk primarily results from timing differences in the repricing of assets and liabilities as they mature (fixed rate instruments) or contractually repriced (floating rate instruments).

The Company monitors this exposure through periodic reviews of the assets and liability position. Estimates of cash flows as well as the impact of interest rate fluctuations relating to the investment portfolio and insurance provisions are modeled and reviewed . The overall objective of these strategies is to limit the net change in value of assets and liabilities arising from interest rate movements. While it is more difficult to measure the interest sensitivity of insurance liabilities than that of the related assets, to the extent that such sensitivities are measurable then the interest rate movements will generate asset value changes that substantially offset changes in the value of the liabilities relating to the underlying products.

The Company is also exposed to the risk of changes in future cash flows from fixed income securities arising from the changes in interest rates.

Awash Insurance Company S.C. Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

(ii) Foreign exchange risk

Foreign exchange risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to the changes in foreign exchange rates.

The Company is exposed to exchange rate risks to the extent of balances and transactions denominated in a currency other than the Ethiopian Birr. The Company has no transaction in foreign currency.

(iii) Price risk

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

The Company's price risk policy requires it to manage such risks by setting and monitoring objectives and constraints on investments, diversification plans, and limits on investments in each sector and market.

The Company has no significant concentration of price risk as there is no active market in Ethiopia.

4.7 Capital management

The Company's objectives when managing capital are to comply with the capital requirements set by the National Bank of Ethiopia, safeguard its ability to continue as a going concern, and to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

4.7.1 Margin of Solvency ratio

According to the Licencing and Supervision of Insurance Business Margin of Solvency (MOS) Directives No. SIB/45/2016 of the National Bank of Ethiopia, an insurer carrying on general business shall keep admitted capital amounting to the highest of 25% of its technical provisions, or 20% of the net written premiums in the last preceding financial year, or the minimum paid up capital. An insurer carrying on long term insurance business shall keep admitted capital amounting to the higher of 10% of technical provisions or the minimum paid up capital.

Awash Insurance Company S.C. Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

MOS ratio is the excess of assets over liabilities maintained for general and long term insurance business. Admissable assets and liabilities stated below is in accordance with the MOS Directives No. SIB/ 45/2016.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

4.8 Fair value of financial assets and liabilities

IFRS 13 requires an entity to classify measured or disclosed fair values according to a hierarchy that reflects the significance of observable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, which comprises of three levels as described below, based on the lowest level input that is significant to the fair value measurement as a whole.

4.8.1 Valuation models

IFRS 13 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable input reflect market data obtained from independent sources; unobservable inputs reflect the the Company's market assumptions.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole.

- · Level 1: Inputs that are quoted market prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active, or other valuation technique in which all significant inputs are directly or indirectly observable from market data. In conclusion, this category is for valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs). This category includes all assets and liabilities for which the valuation technique includes inputs not based on observable date and the unobservable inputs have a significant effect on the asset or liability's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

4.8.2 Financial instruments not measured at fair value

The following Table summarises the carrying amounts of financial assets and liabilities at the reporting date by the level in the fair value hierarchy into which the fair value measurement is categorised. The amounts are based on the values recognised in the statement of financial position.

	-	e 2021	30 June	2020
	Carrying amount Fair value		Carrying amount	Fair value

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

4.8.3 Fair value methods and assumptions

Investment securities

Government bonds are classified as loans and receivables and are measured at amortised cost using the EIR method. This means the amortised cost is determined as the fair value of the bond at inception plus interest accrued using the Effective Interest Rate.

4.8.4 Valuation technique using significant unobservable inputs - Level 3

The Company has no financial asset measured at fair value on subsequent recognition.

4.8.5 Transfers between the fair value hierarchy categories

During the three reporting periods covered by these annual financial statements, there were no movements between levels as a result of significant inputs to the fair valuation process becoming observable or unobservable.

4.9 Offsetting financial assets and financial liabilities

There are no offsetting arrangements. Financial assets and liabilities are settled and disclosed on a gross basis.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

5 Segment information

Segment information is presented in respect of the Company's business segments which represents the primary segment reporting format and is based on the Company's management and reporting structure.

Revenue in these segments is derived primarily from insurance premium and investment income. Expenses for corporate units that render services for all business segments are initially paid by the general business segment and transferred to other business units at cost price. The expenses are allocated based on service man hours rendered by the corporate units to the various business segments.

Business segments

The Company operates the following main business segments:

Non-life (general) business- Includes general insurance transactions with individual and corporate customers. This segment covers the protection of customers' assets (particularly their properties, both for personal and commercial business) and indemnification of other parties that have suffered damage as a result of customers' accidents. All contracts in this segment are short term in nature.

Life business- Includes life insurance policies with individual and corporate customers. This segment covers the protection of the Company's customers against the risk of premature death, disability, critical illness and other accidents.

The segment information provided by the Management Operations Committee for the reporting segments for the year ended 30 June 2021 is as follows:

a Assets and liabilities for each segment at 30 June 2021

	Non- life	Life		Total

These assets represent salvage properties that are fully or partially damaged and fully compensated to the policy holder by the Company. These assets are recognized and classified as held for sale in the financial statement by their carrying amount and fair value less cost of disposal as per IFRS 5. The Company's Management practice regarding these assets is to dispose through public auction. These assets will not be held for more than a year from the date of compensation and their carrying value will only be recovered through disposal rather than continuing use.

b Fair value measurement of the Company's investment properties

The Company's investment property is measured at fair value. These properties include those held for rental purposes. There are currently no restrictions on the realisability of these properties.

Investment property is initially measured at cost including transaction costs and subsequently measured at depreciated cost (less any accumulated impairment losses). Depreciation is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives of 50 years. The fair value of investment properties has been disclosed as required.

The fair value of the Company's investment property as at the reporting date has been arrived at by independent professional and qualified estate surveyors and valuers. These valuers have appropriate qualifications and recent experience in the valuation of properties in the relevant locations. The fair value was determined based on the replacement cost concept which approximates the estimated amount for which a property should exchange on the date of valuation between knowledgeable willing parties in an arm's length transaction after proper marketing, prudently and without compulsion. This implies a market comparable approach that reflects the recent transaction prices for similar properties. In estimating the fair value of the properties, the highest and best use of the properties is their current use. There has been no change to the valuation technique during the year.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

Notes to the Financial Statements

31 Defined benefit obligations

The Company operates an unfunded severance benefit plan for its employees who have served the Company and are below the retirement age (i.e. has not met the requirement to access the pension fund). The Severance Benefit Entitlement is provided under the Labour Proclamation No. 1156/2019.

Description of the plan:

If an employee is terminated due to redundancy, in the first year, the pay is thirty times the average daily wages of the last week of service. If less than one year service, severance pay is calculated in proportion to the period of service .

For more than one year service, payment is increased by a third of the benefit for every additional year of service provided that the total amount does not exceed twelve months' wage of the employee.

This benefit is also entitled to employees in the event of death in service, voluntary resignation and disability after 5 years of service.

Key Risks

The key risks associated with the severance benefit entitlement are as follows:

- ${\tt 1.} \ {\tt The \ benefits \ are \ linked \ to \ salary \ and \ consequently \ have \ an \ associated \ risk \ to \ increases \ in \ salary.}$
- The benefits are defined as per the Labour Proclamation. Amendments to the Labour Proclamation could change these benefits and materially change the costs of the Company.
- ${\it 3.} \ {\it The severance benefit is unfunded with no separate assets, investment risk would therefore not arise.}$
- 4. Severance benefits are payable where an employee's contract of employment is terminated by the initiation of the employer against the provision of Law. The actual cost to the Company of the benefits is therefore subject to the demographic movements of employees.

Below are the details of movements and amounts recognised in the financial statements:

	30 June	30 June
	2021	2020
	Birr'000	Birr'000

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

D Assumptions

The significant actuarial assumptions were as follows:

i) Financial assumption: long term average

30 June	30 June
2021	2020
Birr'000	Birr'000
14.25%	14%
15%	15%

Discount Rate (p.a) Rate of Pension Increase (p.a)

ii) Mortality in Service

The rate of mortality assumed for employees are those according to the A1949/52 as published by the Institute of Actuaries. These rates combined are approximately summarized as follows:

Age	Mortality	rate
	Male	Female
20	0.11%	0.11%
25	0.11%	0.11%
30	0.12%	0.11%
35	0.13%	0.12%
40	0.19%	0.15%
45	0.33%	0.23%
50	0.60%	0.42%
55	1.04%	0.75%
60	1.72%	1.27%

iii) Withdrawal from Service

The withdrawal rates are believed to be reasonably representative of the Ethiopian experience. The valuation assumed that resignation rates to be 1% to 2.5% at age 45 to 35 respectively. 6% at age 30, 12% at age 25, 15% at age 20 (and below) to 0% at age 50.

 $The \ sensitivity \ of the \ overall \ defined \ benefit \ liability \ to \ changes \ in \ the \ weighted \ principal \ assumption \ is:$

	Impact on defined benefit obligation						
	30 June 2021 30 June 202						2020
	Scenario 1	Scenario 2	Scenario 3	Scenario 4	Scenario 5	Impact of an	Impact of a
	Base	Discount	Salary Rate	Discount	Salary Rate	increase Birr'000	decrease Birr'000
		Rate		Rate			
		Increased	Decreased by		Decreased by		
		by 1%	1%	by 1%	1%		
Discount rate	14.25%	15.25%	14.25%	13.25%	14.25%	13%	14%
Salary increase rate	15.00%	15.00%	16.00%	15.00%	14.00%	15%	14%
Net liability at start of period	8,261	8,261	8,261	8,261	8,261	7,389	7,389
Expense recognised in PL	5,779	5,779	5,779	5,779	5,779	6,472	6,472
Expense recognised in OCI	527	(126)	1,243	1,277	(105)	(705)	(1,899)
Employer contributions	(4,906)	(4,906)	(4,906)	(4,906)	(4,906)	(4,247)	(4,247)
Net liability at end of period	9,661	9,009	10,377	10,411	9,029	8,910	7,716

The above sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the pension liability recognised within the statement of financial position.

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

	30 June 2021	30 June 2020
	Birr'000	Birr'000
32 Share capital		
Subscribed:		
2,400,000 ordinary shares of Birr 500 each	1,200,000	600,000
Issued and fully paid:		
Ordinary shares of Birr 500 each	754,883	528,616
Share premium	1,835	778

The Company was registered and had secured license number 003 from the National Bank of Ethiopia on 1st October 1994 to engage in General and Long Term Insurance Busineses. Total subscribed shares at the Balance sheet date was Birr 1,200,000,000 out of which (2021: Birr 754,883,000) was paid.

The paid up capital of the Company is as shown below:

30 June	30 June
2021	2020
Birr'000	Birr'000
739,883	513,616
15,000	15,000
754,883	528,616

Share premium represents the excess of contributions received over the nominal value of shares issued.

33 Earnings per share

Basic earnings per share (EPS) is calculated by dividing the profit after taxation by the weighted average number of ordinary shares in issue during the year.

	30 June	30 June
	2021	2020
	Birr'000	Birr'000
Profit attributable to shareholders	270,082	209,837
Weighted average ordinary shares in issue with a value of:	754,883	528,616
Basic & diluted earnings per share (Birr)	0.36	0.40

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. There were no potentially dilutive shares at the reporting date (30 June 2021: nil) hence the basic and diluted loss per share have the same value.

Notes to the Financial Statements

38 Contingent liabilities

Claims and litigation

The Company, like all other insurers, is subject to litigation in the normal course of its business. The Company does not believe that such litigation will have a material effect on its profit or loss and financial condition.

The Company, together with other industry members, will participate on litigations mainly relating to the insurance coverage contained in the casualty insurance contracts it issued. If the courts continue in the future to expand the intent and scope of coverage contained in the insurance contracts issued by the Company, as they have in the past, additional liabilities would emerge for amounts in excess of the carrying amount held. These additional liabilities cannot be reasonably estimated but could have a material impact on the Company's future results. The liabilities carried for these claims as at this year end are reported in Note 27 and are believed to be adequate based on known facts and current law.

39 Commitments

Right of use asset commitments - Company as lessee

The Company leases various properties under various non-cancellable lease agreements. The lease terms are between 36 and 60 years, and these lease agreements can be renewed at the end of the each lease period.

The future aggregate minimum lease payments under non-cancellable leases are as follows:

	2021 Birr'000	2020 Birr'000
No later than 1 year	-	-
Later than 1 year and no later than 2 years	2,375	-
Later than 2 year and no later than 5 years	7,124	7,124
Later than 5 years	61,742	64,117
Total	71,241	71,241

30 June

30 June

40 Events after reporting period

In the opinion of the Board of Directors, there were no significant post balance sheet events which could have a material effect on the state of affairs of the Company as at 30 June 2021 and on the profit for the period ended on that date, which have not been adequately provided for or disclosed.

41 Actuarial valuations

The latest available actuarial valuation of the life business was performed as at 30 June 2021. The book value of the life funds as at that date was Birr 226,194,994 over its net actuarial liabilities. The valuation of the Company's life business funds as at 30 June 2021 was carried out by Zamara (consultants and actuaries).

The valuation was done on the following principles:

Annual IFRS Financial Statements

For the year ended 30 June 2021

Notes to the Financial Statements

Individual life assurances and annuities

- i The valuation method and basis for the Individual life assurances can be summarized as a Gross Premium Valuation (GPV) method on policy by policy basis.
- ii The method entails making monthly projections of all items of future outgo and income on a policy by policy basis. The future outgo comprises of all future expected contractual benefits and expenses, including bonuses and surrenders.
- iii The Gross Premium Valuation reserves are then computed by deducting the present value of future income from the present value of future outgo at the prescribed valuation rate of interest.
- iii Negative reserves are possible in cases where the premium basis is stronger than the valuation basis. All negative reserves were zeroised on a policy by policy basis.

Group life

- i For group term assurances and Group Medical assurances, the reserve has been determined as the sum of:
- * The Unearned Premium Reserve (UPR) calculated using the 365th method that assumes the risk profile is spread evenly over the year.
- * The Incurred But Not Reported (IBNR) claims reserve calculated assuming a 3months annual premiums. The IBNR provision shall be the higher of 10% of the Net Earned Premium
- ii In establishing the total actuarial liabilities, a prudent approach of not making any deductions from the liabilities in respect of reassurances ceded.

Assumptions

iii The Gross Premium Valuation reserves are then computed by deducting the present value of future income from the present value of future outgo at the prescribed valuation rate of interest.

Mortality assumptions were based on the KE 07-10 mortality tables for assured lives with a loading of 150%.

The valuation rate of interest assumed was 10% p.a.

The Fixed Per Policy expense assumption was Birr 3,900 Per annum.

The Expense inflation rate assumed was 13.5%.

The commission assumptions for Individual life policies were as follows;

Type of product	Commi	ssion rate ((%)
	1st year	2nd year	3rd year
5 years endownment	10	3	3
10 years endownment	25	3	3
15 years endownment	35	5	5
20 years endownment	50	10	5

Actuary's Solvency Certificate

Awash Insurance Company S.C.

Actuarial Valuation as at 30 June 2021

Actuary's Solvency Certificate

I, James Israel Omanyala Olubayi of Zamara Actuaries, Administrators and Consultants Limited, Landmark Plaza, 10th Floor, Argwings Kodhek Road, P O Box 52439, Nairobi 00200, Kenya, being a fully qualified Actuary and having conducted an actuarial valuation of the Life Fund as at 30 June 2021 using generally acceptable actuarial principles do hereby certify as under: -

- that in my opinion the value placed upon the aggregate liabilities relating to the longterm insurance business of Awash Insurance Company S.C in respect of policies of valuation adopted by me has been arrived at using a professionally sound and prudent actuarial basis;
- that I am satisfied that the value of assets adopted by me are, on the basis of the auditor's certificate appended to the balance sheet, fully of the value so adopted; and
- that the actuarial valuation revealed an actuarial surplus of E Birr 138,642,996.

James I. O. Olubayi

Fellow of the Institute of Actuaries

Nairobi, Kenya September 2021
